

Varnish or Oil on Your New Boat?

How to treat the teak on your boat is one of many questions the boat owner must answer. Joining a yacht club gives the boat owner access to a host of self-described experts who will debate the pros and cons of all things boatwise. In addition to opinions, these fellow boaters can provide long-winded stories of how things used to be done and how things were done wrong. They will even comiserate with you when that small boat project turns into a month of weekends. Stop by for advice or a beer.

**South Coast Corinthian
Yacht Club**

Yachting Since 1932
